SUMMARY

Full Stack Developer with 4+ years of experience at **Infosys Ltd (Toyota Motor North America)**, building cloud-native, scalable applications using **React, Next.js, Node.js, GraphQL, and PostgreSQL**. Achieved a **40% performance boost** through full-stack optimisation across frontend and backend layers. Proficient in **REST API design, Microfrontend architecture, Gen AI integration**, and secure OAuth 2.0/JWT authentication. Experienced in mentoring developers and deploying production-grade systems on AWS.

SKILLS

- JavaScript (ES6+) and TypeScript
- React, Next.js (SSR, SSG, App Router)
- Redux Toolkit & Context API
- Microfrontend (Module Federation)
- Node.js and Express.js
- REST API design and GraphQL
- PostgreSQL and SQL Server
- Python (scripting and automation)
- Jest, React Testing Library
- SonarQube for code quality
- OAuth 2.0, JWT, MSAL, RBAC hardening
- CI/CD pipelines (Jenkins) and GitHub
- AWS (CloudFront, S3, EC2, Lambda basics)
- Gen AI integration (Gemini API, LangChain basics)
- Webpack, Vite, and build optimisation
- Docker basics and containerisation

EXPERIENCE

Full Stack Developer — Infosys Ltd (Client: Toyota Motor North America)
Hyderabad, Telangana | February 2022 – Present

- **Architected cloud-native React/Next.js + Node.js solutions** for 10,000+ concurrent users, boosting performance by 40% via code splitting, SSR, and memoisation.
- **Engineered scalable RESTful APIs and GraphQL services** using Node.js/Express, integrated with PostgreSQL and SQL Server for high-reliability data workflows.
- **Designed and deployed Microfrontend architecture** using Module Federation, enabling independent deployment of 5+ feature modules.
- **Secured distributed environments** using OAuth 2.0, SSO, MSAL, and strict HTTP headers (CSP, HSTS); enforced quality via SonarQube in CI/CD pipelines.
- **Optimised PostgreSQL and SQL Server queries**, reducing average API response time by 30% through indexing and query restructuring.
- **Deployed and maintained AWS infrastructure** (CloudFront, S3, EC2) with 99.9% uptime, ensuring scalability and secure data storage.
- **Mentored 5+ developers** in cloud-native full-stack patterns, API design, TypeScript best practices, and secure coding standards.

PROJECTS

Hold Management | Toyota Motor North America
React, TypeScript, Next.js, Node.js, Express, PostgreSQL, GraphQL, AWS (CloudFront, S3), Microfrontend

- **Developed a full-stack Microfrontend cloud application** serving 10,000+ internal users; improved system response time by 35%.
- **Built Node.js/Express backend APIs** and GraphQL resolvers for real-time vehicle hold tracking, optimising data fetching with DataLoader batching.
- **Architected and deployed AWS infrastructure** (CloudFront, S3, EC2) achieving 99.9% uptime with secure, scalable data storage.
- **Built accessible WCAG-compliant UI components** using React and Material UI, increasing user engagement by 25%.
- **Achieved 85% test coverage** with Jest and React Testing Library, reducing production defects by 40%.

Supplier Collaboration Portal | Toyota Motors

React, Redux Toolkit, Node.js, REST APIs, SQL Server, Storybook, Figma, JWT

- **Engineered a two-way real-time parts ordering portal** between OEM and supplier stakeholders with complex data grids and live order tracking.
- **Optimised SQL Server data handling**, improving query performance and ensuring high reliability for critical order processing workflows.
- **Implemented JWT authentication with token rotation** and route interceptors, securing all API endpoints.
- **Standardised design system with Storybook**, ensuring visual consistency between Figma prototypes and production components.

AI Chatbot Web Application | sharathai.netlify.app

React, TypeScript, Tailwind CSS, Gemini API

- **Built a Gen AI–powered conversational UI** using Google Gemini API with real-time streaming responses and context-aware prompting for high-fidelity interactions.
- **Designed mobile-first responsive layout** using Tailwind CSS, ensuring pixel-perfect rendering across all device types.
- **Applied Clean Architecture principles** to separate API service calls, business logic, and UI layers — enabling easy future LLM model swaps.
- **Implemented optimistic UI updates** and graceful error handling to deliver a smooth, production-grade chat experience.

EDUCATION

Master of Technology (M.Tech)

Anurag University, Hyderabad — January 2022

Bachelor of Technology (B.Tech)

Jawaharlal Nehru Technological University, Hyderabad — January 2020

AWARDS & CERTIFICATIONS

- Microsoft Certified: GitHub Copilot – Exam GH-300
- Infosys Certified React Professional, Infosys Ltd.
- Infosys Certified Angular Professional, Infosys Ltd.
- Infosys Certified Node Professional, Infosys Ltd.
- NamasteDev Certified Node.js, NamasteDev
- Insta Award (Infosys) — Recognised for outstanding contribution to the Toyota project delivery
- Best Team Player Award — Effective collaboration in Q3 2025 cycle
